PROFILE

I'm a Software Engineering student who enjoys turning ideas into practical, secure software. I build full-stack applications, APIs, databases, and backend systems, learning best practices through hands-on projects.

WORK EXPERIENCE

Daratim Information Technology

2030 – PRESENT

Junior Software Engineer

- Built and deployed scalable backend systems and RESTful APIs using TypeScript, Node.js, and Express, with real-world business logic and data integrity in mind.
- Collaborated within cross-functional engineering teams, delivering production-grade features across authentication, database integration, and third-party API connections.

Sanfaani Ecosystem

2025 – 2026

Intern

- Collaborated on a real production e-commerce backend within the Sanfaanisaas GitHub organization, implementing the product catalogue, server-side cart with merge-on-login, atomic checkout with stock reservation, and Paystack webhook payment integration, all in TypeScript, Node.js, Express, and MongoDB.

EDUCATION

Bsc. In Software Engineering – in view

2024 – Present

Thomas Adewumi University

GPA: 4.46 / 5.0
